

**CSE541      EXERCISE 12**

**Chapters 10, 11, 12** Read and learn all examples and exercises in the chapters as well!

**QUESTION 1**

Let **GL** be the Gentzen style proof system for classical logic defined in chapter 11. Prove, by constructing a proper decomposition tree that

- (1)  $\vdash_{\mathbf{GL}}((\neg a \Rightarrow b) \Rightarrow (\neg b \Rightarrow a))$ .
- (2)  $\not\vdash_{\mathbf{GL}}((a \Rightarrow b) \Rightarrow (\neg b \Rightarrow a))$ .

**QUESTION 2**

Show that tree below do not constitute a proof in **GL** defined in chapter 10? Provide a correct proof.

**QUESTION 3**

Let **GL** be the Gentzen style proof system for classical logic defined in chapter 11. Prove, by constructing a counter-model defined by a proper decomposition tree that

$$\not\models ((a \Rightarrow (\neg b \cap a)) \Rightarrow (\neg b \Rightarrow (a \cup b))).$$

**QUESTION 4** Let **LI** be the Gentzen system for intuitionistic logic as defined in chapter 11.

Show that

$$\vdash_{\mathbf{LI}} \neg\neg((\neg a \Rightarrow b) \Rightarrow (\neg b \Rightarrow a)).$$

**QUESTION 5** We know that the formulas below are not Intuitionistic Tautologies. Verify whether **H** semantics (chapter 5) provides a counter-model for them.

$$((a \Rightarrow b) \Rightarrow (\neg a \cup b)),$$

$$((\neg a \Rightarrow \neg b) \Rightarrow (b \Rightarrow a)).$$

**QUESTION 6** Show that

$$\vdash_{\mathbf{LI}} \neg\neg((\neg a \Rightarrow \neg b) \Rightarrow (b \Rightarrow a))$$

**QUESTION 7** Use the heuristic method defined in chapter 12 to prove that

$$\not\vdash_{\mathbf{LI}} ((\neg a \Rightarrow b) \Rightarrow (\neg b \Rightarrow a)).$$
