

CSE594 Mobile Computing for Informal Economies  
Fall 09 Anita Wasilewska & Jennifer Wong

Homework #3  
Due in Lecture Oct. 21

Each group should do a preliminary search on for published papers for their survey report. Each group must verify that there are enough publications under their topic area to write a survey. If not enough work has been done in the particular area, another suitable topic must be selected.

All groups must verify in lecture that a suitable set of research works/papers have been found for their survey topic. Failure to do preliminary search which results in notification of insufficient work in the area after this date will result in the loss of 1 letter grade on the survey paper.
