

Notes of CSE 594 on 10/28/09

- **PPT 6 : Emergency**
 - Blood group information of the user is stored
 - Target : literate people
 - Special password mechanism to edit user's information to be implemented
- **PPT 7 : Tipster**
 - Motivate user to save money and invest savings in a wise manner
 - Change personal income → fixed income
 - Change professional income → occasional income
 - Same goes for expenditure
 - Total income and/or expenditure should be a sum of fixed + occasional
 - Summary to be displayed in 2 levels :
 - fixed income vs. fixed expenditure
 - Occasional income vs. occasional expenditure
 - Invest savings in fixed or recurring deposit on the basis of spending habits
- **PPT 8 : Learn Easy**
 - Category chosen : history
 - Success of application based on quality of questions
 - Levels of quiz
- **PPT 9 : Health 4 U**
 - Nutrition intake advisor
 - Region chosen : Mississippi ; language : English
 - Application recommends user to eat/ exercise based on person's eating habits , history, budget
 - Details of tracking history of the user's eating habits not explained
 - Maintain disease and health library which provide addresses of places for free health checkup etc : sources of info not presented
 - Suggestion by Prof. : instead of recommending the user to exercise, decrease the diet
- **PPT 10 : Mobile Medic**
 - Follow up with the doctor
 - Send SMS
 - Useful in cases when the patient is illiterate or patients and doctor do not speak any common languages
 - Templates for different symptoms
 - User can choose degree of severity of the symptom
 - An SMS would be sent to the doctor to which the doctor replies
