

- **Calorimeter**

- Focus on creating template of application
- Separate storage for pictures needed
- Application should be flexible enough to be able to change the pictures and information associated with pictures without much coding

- **Math Easy**

- Icons should not be in English
- A simple template like this could work well for questions of easy level
- 

Question: 3 – 1

- The circles could be implemented as a grid

- **Emergency Assistant**

- UML Diagram – highly recommended to each group
- Refer their webpage for the same
- Problem :
  - Simulate two phones at the same time (dispatcher and cell phone )
- Solutions proposed:
  - Use Bluetooth
  - Messaging plan

- *NOTE : The history questions using flags as pictures for options are not recommended*
