

Dictionary

- Working on using Kuix, issues in implementation
- Should find any set of picture (png file format), and record any wav files to have a working prototype

Fisher Woman

- Converted to a management system that keeps track of fish purchased, dried amounts and price sold
- This system is then used to estimate the minimum price based on the amount of fish in inventory
- Need to know fresh/dried fish weights for estimate

Account Book (Raksik)

- Tried to switch to Kuix (FAILED)
- Converted back to J2ME
- Built low level Gui to control the layout of the buttons
- Able to create a 2x3 layout of buttons (6 total)
