

# CSE 651 : Seminar on Mobile Computing for Informal Economies (Prof. Anita Wasilewska)

Conceptualization of Software for  
**C3: ADD - Neighborhood Association**

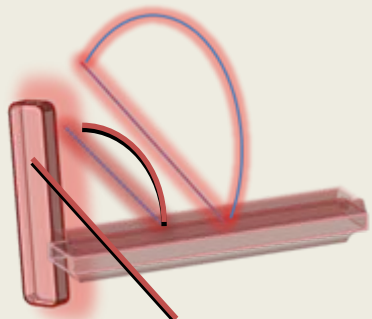

Fatimata Sow, Aïssatou Siby

Tapsie Giridher

# Conceptualization

- Management of pre-school
    - Maintenance of information about classes
    - Keep records of timetable of classes , attendance
    - Schedule of teachers ( 5 full time + 12 volunteers )
    - Would require extensive use of calendar
  - Management of cyber café
    - Keep records of customer in the form of counter
    - The duration of each customer should be recorded
    - Record of money earned through customers visiting the cyber café
- ..... (contd.)

# Conceptualization .. (contd.)

- Software to educate children
  - Create software ( mobile application) which could teach English alphabet .
  - The software could associate each letter with a picture .
  - In this way the software would be language independent.
