

CURRICULUM VITAE

YANHONG ANNIE LIU

April 15, 2024

Computer Science Department
Stony Brook University, State University of New York
Stony Brook, NY 11794-2424
(631) 632-8463

liu@cs.stonybrook.edu
<https://www.cs.stonybrook.edu/~liu>

RESEARCH INTERESTS

Languages and algorithms, especially systematic methods for design and optimizations. Program analysis and transformation for incremental computation and concurrent and distributed computation. Applications in optimizing compilers, interactive environments, real-time and embedded systems, database systems, knowledge representation and reasoning, distributed systems, and security.

EDUCATION

- 09/95 – 07/96 Cornell University • Post-Doc Languages and optimizations
- 08/90 – 09/95 Cornell University GPA 4.0+ • Ph.D., Computer Science, January 1996
- M.S., Computer Science, May 1992
- 09/86 – 01/90 Tsinghua University GPA 4.0 • M.Eng., Computer Science, November 1988
- 09/83 – 08/87 Peking University GPA 3.9 • B.S., Computer Science, June 1987

RESEARCH AND WORK EXPERIENCE

- 08/08 – present Professor, Computer Science Department, Stony Brook University
- 08/23 – 12/23 Visiting Scientist, Simons Institute for the Theory of Computing, UC Berkeley
- 07/08 – 07/08 Visiting Researcher, Microsoft Research Asia
- 09/04 – 07/06 Member of Chair Professor Team of Andrew Chi-Chih Yao, Tsinghua University
- 08/00 – 08/08 Associate Professor, Computer Science Department, Stony Brook University
- 08/96 – 08/00 Assistant Professor, Computer Science Department, Indiana University
- 09/95 – 07/96 Post-Doctoral Associate, Computer Science Department, Cornell University
- 05/92 – 08/92 Summer Research Intern, System Science Lab., Xerox Webster Research Center
- 05/91 – 09/95 Graduate Research Assistant, Computer Science Department, Cornell University
- 08/90 – 12/91 Teaching Assistant, Computer Science Department, Cornell University
- 08/90 – 08/90 Programmer of the Computer Science Dept. information lookup system, Cornell U.
- 01/88 – 07/90 Researcher, Research Inst. of Petroleum Exploration & Development and Tsinghua U.
- 01/88 – 07/88 Teaching Assistant, Computer Science Department, Tsinghua University
- 09/87 – 01/90 Research Assistant, Computer Science Department, Tsinghua University
- 07/87 – 08/87 Analyst in a study of software industry in major cities of northeast China, Peking U.
- 07/86 – 07/86 Developer of a logic DB query language interpreter for CAI at Peking University
- 05/85 – 09/85 Programmer/Analyst for MIS development at Nanjing Automobile Corporation
- 07/84 – 10/84 Programmer for the personnel administration system at Peking University

AWARDS AND HONORS

- Dean’s Award, College of Engineering and Applied Sciences, Stony Brook University, October 2020.
- Excellence in Research, Computer Science Department, Stony Brook University, August 2016.
- Best Student Paper Award, for High-Level Executable Specifications of Distributed Algorithms by Y. A. Liu, S. D. Stoller, and B. Lin, 14th International Symposium on Stabilization, Safety, and Security of Distributed Systems, Toronto, October 2012.
- Chancellor’s Award for Excellence in Scholarship and Creative Activities, State University of New York, April 2010.
- Undergraduate College Faculty Fellow, Stony Brook University, 2009.
- Recognition of Service Award, Association for Computing Machinery (ACM), May 1999.
- Elected Member of IFIP Working Group 2.1, Oxford, U.K., January 1998.
- Liu Memorial Award, for Excellent Progress in the Doctoral Program and High Potential for a Successful Academic Career, The Graduate School, Cornell University, May 1992.
- Awarded guaranteed admission to all graduate schools in China, Peking Univ., June 1986.
- Numerous awards and prizes at Peking University and Tsinghua University, 1984–1989.
- Winner (fourteenth place) of the National Mathematics Contest, Beijing region, May 1982.

GRANTS

- Principal Investigator, *SHF: Medium: Configuration for Assurance: Safe, Live, and Secure Distributed Systems*, with Scott Stoller, co-Principal Investigator. National Science Foundation, 2020–2025.
- Co-Principal Investigator, *Resilience through Distribution, Replication, and Coordination*, with Scott Stoller, Principal Investigator. Office of Naval Research, 2021–2022.
- Co-Principal Investigator, *Knowledge and Reasoning for Drastic Program Improvement: Melding Formal and Statistical Approaches*, with Scott Stoller, Principal Investigator. Office of Naval Research, 2019–2022.
- Principal Investigator, *SHF: Large: From Clarity to Efficiency for Distributed Algorithms*, with Scott Stoller, co-Principal Investigator. National Science Foundation, 2014–2020.
- Co-Principal Investigator, *BIGDATA: F: DKM: DKA: Big Data Modeling and Analysis with Depth and Scale*, with C.R. Ramakrishnan, Principal Investigator, Maureen O’Leary, I.V. Ramakrishnan, Scott A. Smolka, and David S. Warren, co-Principal Investigators. National Science Foundation, 2014–2020.
- Co-Principal Investigator, *Algorithm Diversity for Resilient Systems*, with Scott Stoller, Principal Investigator. Office of Naval Research, 2015–2019.
- Co-Principal Investigator, *SHF: Medium: Performance Analysis and Optimization for Logic Rule Engines*, with Michael Kifer, Principal Investigator, and David S. Warren, co-Principal Investigator. National Science Foundation, 2010–2017.

- Co-Principal Investigator, *Collaborative Research: Innovative Active Learning Using Tablets*, with Ahmad Esmaili, Principal Investigator. National Science Foundation, 2013–2016.
- Principal Investigator, *EAGER: From Clarity to Efficiency for Distributed Algorithms*, with Scott Stoller, co-Principal Investigator. National Science Foundation, 2012–2016.
- Principle Investigator, *NSF/TCPP Curriculum: Concurrent and Distributed Algorithms*, with Scott Stoller, co-Principle Investigator. NSF/IEEE-TCPP Curriculum Initiative on Parallel and Distributed Computing Early Adopter Program, 2012-2013.
- Principal Investigator, *Clarity and Efficiency in Design*, with Scott Stoller, co-Principal Investigator. National Science Foundation, 2006–2011.
- Principal Investigator, *Generating Incremental Implementations from Set-Based Specifications*. Hengsoft, 2009-2010.
- Principal Investigator, *Invariant Rules for Software Producibility and Assurance*, with Scott Stoller, co-Principal Investigator. Office of Naval Research, 2009–2010.
- Co-Principal Investigator, *Runtime Monitoring and Model Checking for High-Confidence System Software*, with Erez Zadok, Principal Investigator, and Radu Grosu, Scott Smolka, and Scott Stoller, co-Principal Investigators. National Science Foundation, 2005–2010.
- Principal Investigator, *Nuclear Power Plant Digital Feedwater Control System Modeling and Simulation*. Brookhaven National Laboratory, 2007–2008.
- Co-Principal Investigator, *Tools for Detecting and Reconciling Security Policy Conflicts*, with Scott Stoller, Principal Investigator. Office of Naval Research through Naval Research Laboratory, 2006–2008.
- Principal Investigator, *From Rules to Analysis Algorithms with Time and Space Guarantees*. National Science Foundation, 2003–2008.
- Co-Principal Investigator, *Generating Efficient Trust Management Software from Policies*, with Scott Stoller, Principal Investigator. Office of Naval Research, 2004–2007.
- Co-Principal Investigator, *A Deductive Engine for the Semantic Web*, with Michael Kifer, Principal Investigator, and C.R. Ramakrishnan and I.V. Ramakrishnan, co-Principal Investigators. National Science Foundation, 2003–2007.
- Principal Investigator, *Ad Hoc Command, Control, and Communication Networks for Homeland Security*, with Alex Mohr, co-Principal Investigator. Convergent Technologies Consortium, 2005.
- Principal Investigator, *From Rules to Analysis Algorithms with Time and Space Guarantees*. National Science Foundation, 2002–2004.
- Principal Investigator, *Program Transformation and Analysis for Reactive Systems*, with Scott Stoller, co-Principal Investigator. Office of Naval Research, 2000–2004.
- Principal Investigator, *Motion Controller Scripting Language*. Anorad Corporation and Stony Brook Strategic Partnership for Industrial Resurgence Grant, 2002.
- Project Director, *Establishing Design and Analysis Research Lab*. Stony Brook Graduate Research Initiative and University Research Development Fund, 2001–2002.
- Principal Investigator, *Transformational Development of Reactive Systems*. Office of Naval Research, 1998–2001.

- Principal Investigator, *A General and Powerful Method for Program Optimization*, with Scott Stoller, co-Principal Investigator. National Science Foundation, 1997–2001.
- Principal Investigator, *Automating Incrementalization—A Key Optimization to Produce Robust High-Performance Software from High-Level Specifications*. Motorola University Partnership in Research Grant, 1997–2000. (Renewed each year)
- Principal Investigator, *Investigation into Incrementalization*. Motorola University Research Grant, 1997.

PUBLICATIONS

Books

1. M. Kifer and Y. A. Liu, editors. *Declarative Logic Programming: Theory, Systems, and Applications*. Association for Computing Machinery and Morgan & Claypool, 2018.
2. Y. A. Liu. *Systematic Program Design: From Clarity To Efficiency*. Cambridge University Press, 2013.

Journal Issues

3. A. Brik, A. Formisano, Y. A. Liu, and J. Vennekens, editors. *The 37th International Conference on Logic Programming Special Issue II. Theory and Practice of Logic Programming*, Volume 21, Issue 6, pp.698-869, November 2021.
4. A. Brik, A. Formisano, Y. A. Liu, and J. Vennekens, editors. *The 37th International Conference on Logic Programming Special Issue I. Theory and Practice of Logic Programming*, Volume 21, Issue 5, pp. 521-697, September 2021.

Proceedings

5. Y. A. Liu and D. Warren, editors. *Programming with High-Level Abstractions, Proceedings of the 3rd Workshop on Logic and Practice of Programming*, <https://lpop.cs.stonybrook.edu/lpop2022>, Online, December 13, 2022.
6. A. Formisano, Y. A. Liu, B. Bogaerts, A. Brik, V. Dahl, C. Dodaro, P. Fodor, G. L. Pozzato, J. Vennekens, and N.-F. Zhou, editors. *Proceedings 37th International Conference on Logic Programming (Technical Communications), Electronic Proceedings in Theoretical Computer Science*, volume 345, <https://arxiv.org/abs/2109.07914>, September 20–27, 2021.
7. E. Komendantskaya and Y. A. Liu, editors. *Practical Aspects of Declarative Languages, 22nd International Symposium, Proceedings, Lecture Notes of Computer Science*, volume 12007. Springer, 2020.
8. Y. A. Liu and M. Matos, editors. *Proceedings of the 2nd Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems*, http://www.cse.chalmers.se/~elad/APPLIED2019/applied_2019_proceedings_full.pdf, Budapest, Hungary, October 14, 2019.

SOFTWARE SYSTEMS

- Y. Tong, Y. A. Liu, and B. Lin. Alda—A language integrating logic rules with sets, functions, update, and objects, including concurrent and distributed objects. Stony Brook U., 2018–present. <https://github.com/DistAlgo/alda>
- B. Lin and Y. A. Liu. DistAlgo—A very high-level language for distributed algorithms. Stony Brook U., 2010–present. <https://github.com/DistAlgo/distalgo>
- J. Brandvein, Y. A. Liu, and B. Lin. IncOQ—A system for generating efficient implementations of demand-driven incremental object queries. Stony Brook U., 2010–present. <https://github.com/IncOQ/incoq>
- M. Gorbovitski, Y. A. Liu, and Eric Keough. InvTS—A system for invariant-driven transformations. Stony Brook U., 2005–present. <https://github.com/InvTS/invts>
- Y. A. Liu and T. Tekle. A system for generating efficient implementations from Datalog rules and graph queries. Stony Brook U., 2003–present.
- Y. A. Liu, J. Liu, C. Yu, M. Fazylova, B. Yim, and K. Jakkula. MultiRunner and MultiQuery—Assistants for traversing links and answering queries on the Web. Stony Brook U., 2001–2006.
- G. Gomez and A. Liu. ALPA—Automatic language-based performance analysis tools that generate accurate worst-case running time and space usage given bounds on input sizes. Indiana University and Stony Brook U., 1997–2006.
- Y. A. Liu and N. Li. CACHET continued—A program transformation system for drastic program optimization based on automated incrementalization and powerful program analysis. Indiana University, 1997–2000.
- Y. A. Liu. CACHET—An incremental-attribution-based interactive system that uses systematic program analysis and transformation techniques to derive efficient incremental programs. Cornell University, 1993–1996.
- Y. A. Liu. OGGEB—An expert system for evaluation of oil and gas generation in basins, with interfaces to several graphical tools for geochemical analysis. Research Institute of Petroleum Exploration and Development (CD-RIED) and Tsinghua University, Beijing, 1988–1990.

PATENTS

- Y. A. Liu and T. Wakayama. Incremental algorithms for optimal line-breaking in text layout. U.S. Patent No. 6647533. Issued November 11, 2003.

LECTURES

Presentations and Invited Talks at Conferences and Workshops

1. Integrating logic rules with everything else, seamlessly. The 80th Meeting of IFIP Working Group 2.1, Oxford, U.K., July 17, 2023.
2. Benchmarking for Integrating Logic Rules with Everything Else The 39nd International Conference on Logic Programming, London, U.K., July 12, 2023.
3. Integrating logic rules with everything else, seamlessly. The 39nd International Conference on Logic Programming, London, U.K., July 11, 2023.

4. High-level executable specification and reasoning for improving distributed algorithms, with Scott Stoller. The 44th ACM SIGPLAN Conference on Programming Language Design and Implementation, and The 42nd ACM Symposium on Principles of Distributed Computing, Orlando, Florida, June 17, 2023. (Tutorial, 190 minutes)
5. Recursive rules with aggregation: A simple unified semantics. Meeting of IFIP Working Group 2.1, Online, April 27, 2022.
6. From meta frameworks and transformations to distributed computing and more. ACM SIGPLAN Workshop on Partial Evaluation and Program Manipulation, Philadelphia, Pennsylvania, and Online, January 17, 2022. (Keynote)
7. Recursive rules with aggregation: A simple unified semantics. International Symposium on Logical Foundations of Computer Science, Deerfield Beach, Florida, Virtual, January 11, 2022.
8. Discrete math with programming, A principled approach. Meeting of IFIP Working Group 2.1, Online, September 2, 2021.
9. Brief Announcement: What's live? Understanding distributed consensus. The 40th ACM Symposium on Principles of Distributed Computing, Salerno, Italy, Virtual, July 29, 2021.
10. Discrete Math with programming: A principled approach. The 52nd ACM Technical Symposium on Computer Science Education, Toronto, Canada, Virtual, March 19, 2021.
11. Distributed computing: Logic, algorithms, and programming. Meeting of IFIP Working Group 2.1, Online, December 1, 2020.
12. Assurance of distributed algorithms and systems: Runtime checking of safety and liveness. The 20th International Conference on Runtime Verification, Los Angeles, CA, Virtual, October 6, 2020. (Tutorial, 120 minutes)
13. Knowledge of uncertain worlds: Programming with logical constraints: An overview. The 35th International Conference on Logic Programming, Rende (CS), Italy, Virtual, September 25, 2020.
14. Recursive rules with aggregation: A simple unified semantics (Extended abstract). The 36th International Conference on Logic Programming, Rende (CS), Italy, Virtual, September 24, 2020.
15. Knowledge of uncertain worlds: Programming with logical constraints: An overview. The 17th International Conference on Principles of Knowledge Representation and Reasoning, Rhodes, Greece, Virtual, September 16, 2020.
16. Knowledge of uncertain worlds: Programming with logical constraints. The Symposium on Logical Foundations of Computer Science, Deerfield Beach, Florida, January 4, 2020.
17. Distributed algorithms made clear: For understanding by humans and reasoning by machines. The 6th Workshop on Formal Reasoning in Distributed Algorithms, co-located with DISC 2019, Budapest, Hungary, October 18, 2019.
18. Moderately complex Paxos made simple: High-level executable specification of distributed algorithm. The 21st International Symposium on Principles and Practice of Declarative Programming, Porto, Portugal, October 9, 2019.

19. Rules with negation in recursion: founded semantics and constraint semantics. The 35th International Conference on Logic Programming, Las Cruces, New Mexico, USA, September 24, 2019.
20. Extended magic for negation: Efficient demand-driven evaluation of stratified Datalog with precise complexity guarantees. The 35th International Conference on Logic Programming, Las Cruces, New Mexico, USA, September 23, 2019.
21. From classical to blockchain consensus: What are the exact algorithms? with Scott Stoller. The 38th ACM Symposium on Principles of Distributed Computing, Toronto, Canada, July 29, 2019. (Tutorial, 180 minutes)
22. Logical clocks are not fair: What is fair? A case study of high-level language and optimization. Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems, Egham, U.K., July 27, 2018.
23. Easier rules and constrains for programming. Workshop on Logic and Practice of Programming, Oxford, U.K., July 18, 2018.
24. Role-based access control as a programming challenge. Workshop on Logic and Practice of Programming, Oxford, U.K., July 18, 2018.
25. From logic to efficient algorithms. The Symposium on Logical Foundations of Computer Science, Deerfield Beach, Florida, January 10, 2018. (Invited Talk)
26. Founded semantics and constraint semantics of logic rules. The Symposium on Logical Foundations of Computer Science, Deerfield Beach, Florida, January 8, 2018.
27. Founded semantics and constraint semantics of logic rules. The 76th Meeting of IFIP Working Group 2.1, Lesbos, Greece, October 18, 2017.
28. High-level executable specification of distributed algorithms, with Scott Stoller and Bo Lin. The 36th ACM Symposium on Principles of Distributed Computing, Washington, DC, July 28, 2017. (Tutorial, 180 minutes)
29. Differentiation, finite differencing, incrementalization: From clarity to efficiency. New Directions in Software Technology, Transformation-Based Generation of High-Assurance Software, St. John, U.S. Virgin Islands, December 6, 2016. (Invited Talk)
30. Distributed programming and ubiquitous programming. The 7th IEEE Annual Ubiquitous Computing, Electronics & Mobile Communication Conference, New York City, October 21, 2016. (Keynote Address)
31. DistAlgo: A language for distributed algorithms. The 72nd Meeting of IFIP Working Group 2.1, Bennington, Vermont, December 12, 2014.
32. Programming distributed algorithms, with Scott Stoller and Bo Lin. Fall School Tutorials, the 2014 ACM SIGPLAN Conference on Systems, Programming, Languages and Applications: Software for Humanity, Portland, Oregon, October 24, 2014. (Tutorial, 90 minutes)
33. Programming distributed algorithms, with Scott Stoller and Bo Lin. The 19th ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming, Orlando, Florida, February 15, 2014. (Tutorial, 180 minutes)
34. Incrementalization: From clarity to efficiency. Joint Mathematics Meetings AMS Special Session on Mathematical Underpinnings of Multivariate Complexity Theory and Algorithm

- Design, and Its Frontiers AND the Field of Incrementalization. San Diego, CA, January 11, 2013. (Invited Talk)
35. From clarity to efficiency for distributed algorithms. The 27th ACM SIGPLAN Conference on Object-Oriented Programming, Systems, Languages and Applications, Tucson, Arizona, October 24, 2012.
 36. From clarity to efficiency for distributed algorithms. The 69th Meeting of IFIP Working Group 2.1, Ottawa, Canada, October 10, 2012.
 37. High-level executable specifications of distributed algorithms. The 14th International Symposium on Stabilization, Safety, and Security of Distributed Systems, Toronto, Canada, October 2, 2012.
 38. From clarity to efficiency for distributed algorithms. ACM SIGPLAN Workshop on Languages for Distributed Algorithms, Philadelphia, Pennsylvania, January 23, 2012.
 39. Programming and optimizing distributed algorithms. The 8th International Conference and Expo on Emerging Technologies for a Smarter World, Hauppauge, NY, November 3, 2011.
 40. Languages for distributed algorithms. The Inaugural Meeting of Working Group on Language Design, Mountain View, CA, June 2, 2011.
 41. Programming and optimizing distributed algorithms. The 66th Meeting of IFIP Working Group 2.1, Atlantic City, New Jersey, September 21, 2010.
 42. Systematic program design: From clarity to efficiency. Dagstuhl Seminar on Software Synthesis, Leibniz Center for Informatics, Schloss Dagstuhl, Germany, December 10, 2009.
 43. A language and framework for invariant-driven transformations. The 8th International Conference on Generative Programming and Component Engineering, Denver, Colorado, October 4, 2009.
 44. Analysis and transformations for efficient query-based debugging. The 8th IEEE International Working Conference on Source Code Analysis and Manipulation, Beijing, China, September 28, 2008.
 45. From clear specifications to efficient implementations. The 62nd Meeting of IFIP Working Group 2.1, Namur, Belgium, December 10, 2006.
 46. Querying complex graphs. The 8th International Symposium on Practical Aspects of Declarative Languages, Charleston, South Carolina, January 10, 2006.
 47. Core role-based access control: Efficient implementations by transformations. ACM SIGPLAN 2006 Workshop on Partial Evaluation and Semantics-Based Program Manipulation, Charleston, South Carolina, January 10, 2006.
 48. Incrementalization across object abstraction. The 20th ACM Conference Object-Oriented Programming, Systems, Languages, and Applications, San Diego, CA, October 20, 2005.
 49. Incrementalization across object abstraction. The 60th Meeting of IFIP Working Group 2.1, Monterey Bay, CA, May 25, 2005.
 50. Querying complex graphs. The 60th Meeting of IFIP Working Group 2.1, Monterey Bay, CA, May 25, 2005.

51. From rules to efficient programs with time and space guarantees. The 5th ACM SIGPLAN International Conference on Principles and Practice of Declarative Programming, Uppsala, Sweden, August 28, 2003.
52. Iterate, incrementalize, and implement: A systematic approach to efficiency improvement and guarantees. The 5th International Workshop on Implicit Computational Complexity, Ottawa, Canada, June 27, 2003. (Invited Talk)
53. Optimizing Ackermann's function by incrementalization. ACM SIGPLAN Workshop on Partial Evaluation and Semantics-Based Program Manipulation, San Diego, CA, June 7, 2003.
54. Analysis of object queries and updates. The 57th Meeting of IFIP Working Group 2.1, New York City, April 3, 2003.
55. From rules to analysis programs with time and space guarantees. The 57th Meeting of IFIP Working Group 2.1, New York City, March 30, 2003.
56. Analysis of object queries and updates. Dagstuhl Seminar on Program Analysis for Object-Oriented Evolution, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, February 27, 2003.
57. Solving regular path queries. The 6th International Conference on Mathematics of Program Construction, Schloss Dagstuhl, Germany, July 8, 2002.
58. Program optimization using indexed and recursive data structures. ACM SIGPLAN Workshop on Partial Evaluation and Semantics-Based Program Manipulation, Portland, Oregon, January 15, 2002.
59. From recursion to iteration: What are the optimizations? The 56th Meeting of IFIP Working Group 2.1, Ameland, The Netherlands, September 10, 2001.
60. Solving regular tree grammar based constraints. The 8th International Static Analysis Symposium, Paris, France, July 17, 2001.
61. Systematic and powerful program optimization by incrementalization. The 38th Meeting of IFIP Working Group 2.4, San Miniato, Italy, May 29, 2001.
62. From recursion to iteration: What are the optimizations? Dagstuhl Seminar on Code Optimization: Trends, Challenges and Perspectives, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, September 20, 2000.
63. Automatic accurate time-bound analysis for high-level languages. The 54th Meeting of IFIP Working Group 2.1, London, U.K., April 5, 2000.
64. Loop optimization for aggregate array computations. The 53rd Meeting of IFIP Working Group 2.1, Potsdam, Germany, June 18, 1999.
65. Dynamic programming via static incrementalization. The 8th European Symposium on Programming, Amsterdam, The Netherlands, March 24, 1999.
66. Dependence analysis for recursive data. The 52nd Meeting of IFIP Working Group 2.1, Quebec City, Canada, October 6, 1998.
67. Loop optimization for aggregate array computations. IEEE International Conference on Computer Languages, Chicago, Illinois, May 16, 1998.
68. Dependence analysis for recursive data. IEEE International Conference on Computer Languages, Chicago, Illinois, May 15, 1998.

69. Efficient computation via incremental computation. International Symposium on Computing and Microelectronics, Peking University, Beijing, China, May 3, 1998.
70. Dynamic programming via static incrementalization. The 51st Meeting of IFIP Working Group 2.1, Magdalen College, Oxford, U.K., January 6, 1998.
71. What does cache-and-prune give us? The 50th Meeting of IFIP Working Group 2.1, Le Bischenberg, Alsace, France, February 20, 1997.
72. Principled strength reduction. IFIP Working Conference on Algorithmic Languages and Calculi, Le Bischenberg, Alsace, France, February 19, 1997.
73. Incrementalization: A general systematic approach for efficiency improvement. The 49th Meeting of IFIP Working Group 2.1, Rancho Santa Fe, CA, June 11, 1996.
74. Discovering auxiliary information for incremental computation. The 23rd Annual ACM SIGPLAN-SIGACT Symposium on Principles of Programming Languages, St. Petersburg Beach, Florida, January 23, 1996.
75. CACHET: A system for deriving incremental programs. The 10th Knowledge-Based Software Engineering Conference, Boston, Massachusetts, November 13, 1995.
76. Selectively caching intermediate results for incremental computation. The 4th International Conference for Young Computer Scientists, Beijing, China, July 19, 1995.
77. Caching intermediate results for program improvement. ACM SIGPLAN Symposium on Partial Evaluation and Semantics-Based Program Manipulation, La Jolla, CA, June 23, 1995.
78. Systematic derivation of incremental programs. Dagstuhl Seminar on Incremental Computation and Dynamic Algorithms, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, May 5, 1994.
79. Deriving incremental programs. The 3rd International Conference for Young Computer Scientists, Beijing, China, July 15, 1993.

Demonstrations of Software at Conferences and Workshops

80. Distributed algorithms specified and improved: execution, runtime checking, and visualization, part of the tutorial, High-level executable specification and reasoning for improving distributed algorithms, with Scott Stoller. The 44th ACM SIGPLAN Conference on Programming Language Design and Implementation, and The 42 ACM Symposium on Principles of Distributed Computing, Orlando, Florida, June 17, 2023.
81. DistAlgo execution, safety and liveness checking, and visualization, part of tutorial, Assurance of distributed algorithms and systems: Runtime checking of safety and liveness, with Scott Stoller. The 20th International Conference on Runtime Verification, Los Angeles, CA, Virtual, October 6, 2020.
82. Consensus algorithms in DistAlgo: Execution, debugging, and visualization, part of tutorial, From classical to blockchain consensus: What are the exact algorithms? with Scott Stoller. The 38th ACM Symposium on Principles of Distributed Computing, Toronto, Canada, July 29, 2019.
83. DistAlgo, part of tutorial, Programming distributed algorithms, with Scott Stoller and Bo Lin. Fall School Tutorials, the 2014 ACM SIGPLAN Conference on Systems, Programming, Languages and Applications: Software for Humanity, Portland, Oregon, October 24, 2014.

84. DistAlgo, part of tutorial, Programming distributed algorithms, with Scott Stoller and Bo Lin. The 19th ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming, Orlando, Florida, February 15, 2014.
85. InvTS: A system for invariant-driven transformations. Dagstuhl Seminar on Software Synthesis, Leibniz Center for Informatics, Schloss Dagstuhl, Germany, December 11, 2009.
86. CACHET: A system for deriving incremental programs. The 10th Knowledge-Based Software Engineering Conference, Boston, Massachusetts, November 14, 1995.
87. CACHET: A system for deriving incremental programs. Dagstuhl Seminar on Incremental Computation and Dynamic Algorithms, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, May 2–6, 1994.

Invited Talks and Lectures at Universities and Research Institutes

88. Recursive rules with aggregation: A simple unified semantics and efficient incremental computation. Simons Institute for the Theory of Computing, UC Berkeley, CA, November 6, 2023.
89. Recursive rules with aggregation: A simple unified semantics. Relational AI, Berkeley, CA, Online, September 19, 2023.
90. Programming and optimizing distributed algorithms: A general method. Centrum Wiskunde & Informatica, Amsterdam, The Netherlands, July 24, 2018.
91. Programming and optimizing distributed algorithms: Paxos and more. Computer Science Department, Peking University, Beijing, China, July 3, 2018.
92. Knowledge representation and reasoning: What about the paradoxes? Information Sciences Seminar, School of Mathematical Sciences, Peking University, Beijing, China, July 2, 2018.
93. From clarity to efficiency for distributed algorithms. Institute of Software, Academy of Sciences, Beijing, China, August 16, 2017.
94. Essence of programming in Python. School of Mathematical Sciences, Capital Normal University, Beijing, China, August 7 and 9, 2017.
95. From clarity to efficiency for distributed algorithms. Kestrel Institute, Palo Alto, CA, July 24, 2015.
96. Incrementalization: From clarity to efficiency. The Graduate Center, City University of New York, April 3, 2014.
97. High-level executable specifications of distributed algorithms. The 2013 IBM Programming Languages Day, IBM Watson Research Center, Yorktown Heights, NY, September 23, 2013.
98. From clarity to efficiency for distributed algorithms. Laboratoire d’Informatique de Paris 6, University Pierre and Marie Curie, Paris, France, March 27, 2013.
99. From clarity to efficiency for distributed algorithms. The 2012 IBM Programming Languages Day, IBM Watson Research Center, Hawthorne, NY, June 28, 2012.
100. Systematic program design: From clarity to efficiency. Kestrel Institute, Palo Alto, CA, June 6, 2011.
101. Alias analysis for optimization of dynamic languages. New England Programming Languages Symposium, Yale University, New Haven, Connecticut, April 29, 2010.

102. A language and framework for invariant-driven transformations. Department of Computer Science, University of Toronto, Toronto, Canada, July 20, 2009.
103. Systematic Design: From clear specifications to efficient implementations. Institute of Software, School of Electronics Engineering and Computer Science, Peking University, Beijing, China, September 17, 2008.
104. Systematic design: From clear specifications to efficient implementations. Institute of Software, Academy of Sciences, Beijing, China, August 26, 2008.
105. Systematic design: From clear specifications to efficient implementations. Microsoft Research Asia, Beijing, China, July 14, 2008.
106. Systematic design: From clear specifications to efficient implementations. Department of Informatics, School of Mathematical Sciences, Peking University, Beijing, China, September 17, 2007.
107. Core role-based access control: efficient implementations by transformations. School of Information, Renmin University, Beijing, China, September 17, 2007.
108. Systematic design: From clear specifications to efficient implementations. Computer Science and Artificial Intelligence Laboratory, Massachusetts Institute of Technology, Boston, Massachusetts, June 21, 2007.
109. Role-based access control: Specification and implementation. Department of Informatics, School of Mathematical Sciences, Peking University, Beijing, China, September 16, 2005.
110. Incrementalization across object abstraction. Microsoft Research Asia, Beijing, China, July 20, 2005.
111. Incrementalization across object abstraction. Institute of Software, Academy of Sciences, Beijing, China, June 24, 2005.
112. Design by building up and breaking through abstractions. Computer Science Department, Tsinghua University, Beijing, China, October 13, 2004.
113. Parametric regular path queries. Department of Informatics, School of Mathematical Sciences, Peking University, Beijing, China, October 12, 2004.
114. Parametric regular path queries. School of Computer Science, University of Waterloo, Waterloo, Canada, June 18, 2004.
115. Iterate, incrementalize, and implement: A systematic approach to efficiency improvement and guarantees. Institute of Software, Academy of Sciences, Beijing, China, October 9, 2003.
116. Iterate, incrementalize, and implement: A systematic approach to efficiency improvement and guarantees. Computer Science Department, Peking University, Beijing, China, October 8, 2003.
117. Iterate, incrementalize, and implement: A systematic approach to efficiency improvement and guarantees. Computer Science Department, Tsinghua University, Beijing, China, October 8, 2003.
118. From rules to analysis programs with time and space guarantees. Department of Informatics, School of Mathematical Sciences, Peking University, Beijing, China, September 24, 2003.
119. From rules to analysis programs with time and space guarantees. The 4th IBM Programming Languages Day, IBM Watson Research Center, Hawthorne, NY, April 25, 2003.

120. Solving regular path queries. New England Programming Languages Symposium, Yale University, New Haven, Connecticut, August 7, 2002.
121. Program optimization using indexed and recursive data structures. New Jersey Programming Languages Seminar, Avaya Labs, Basking Ridge, New Jersey, February 22, 2002.
122. Systematic and powerful program optimization by incrementalization. Department of Computer Science, New York University, New York City, December 7, 2000.
123. Incrementalization: A powerful approach to efficiency improvement. Department of Computer Science, Butler University, Indianapolis, Indiana, April 21, 2000.
124. Incrementalization: A powerful approach to efficiency improvement. Computer Science Department, State University of New York at Stony Brook, Stony Brook, NY, March 20, 2000.
125. Incrementalization: A powerful approach to efficiency improvement. Bell Labs, Lucent Technologies, Naperville, Illinois, November 18, 1999.
126. Loop optimization for aggregate array computations. BRICS, Department of Computer Science, University of Aarhus, Denmark, June 29, 1999.
127. Dynamic programming via static incrementalization. BRICS, Department of Computer Science, University of Aarhus, Denmark, June 29, 1999.
128. Incrementalization: A powerful approach to efficiency improvement. BRICS, Department of Computer Science, University of Aarhus, Denmark, June 28, 1999.
129. Automatic accurate time-bound analysis for high-level languages. DIKU, Department of Computer Science, University of Copenhagen, Denmark, June 23, 1999.
130. Dynamic programming via static incrementalization. DIKU, Department of Computer Science, University of Copenhagen, Denmark, June 22, 1999.
131. Incrementalization: A powerful approach to efficiency improvement. DIKU, Department of Computer Science, University of Copenhagen, Denmark, June 21, 1999.
132. Dependence analysis for recursive data. Département de Mathématiques et d'Informatique, Ecole Normale Supérieure, Paris, France, March 19, 1999.
133. Dependence analysis for recursive data. IBM Thomas J. Watson Research Center, Yorktown Heights, NY, August 21, 1998.
134. Dependence analysis for recursive data. Department of Computer Science, University of Waterloo, Waterloo, Canada, June 22, 1998.
135. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Science, Graduate School of University of Science and Technology of China, Academy of Sciences, Beijing, China, May 8, 1998.
136. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Science, City University of Hong Kong, Hong Kong, May 16, 1997.
137. Incrementalization: A general systematic approach for efficiency improvement. Software Technology Center, Motorola Land Mobile Products Sector, Schaumburg, Illinois, December 6, 1996.
138. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Science and Engineering, Pennsylvania State University, University Park, Pennsylvania, May 2, 1996.

139. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer and Information Science, University of Pennsylvania, Philadelphia, Pennsylvania, April 30, 1996.
140. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Science, University of Waterloo, Waterloo, Canada, April 15, 1996.
141. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Sciences, Purdue University, West Lafayette, Indiana, April 1, 1996.
142. Incrementalization: A general systematic approach for efficiency improvement. Department of Computer Science, New York University, New York City, March 26, 1996.
143. Incrementalization: A general systematic approach for efficiency improvement. AT&T Bell Labs, Murray Hill, New Jersey, March 21, 1996.
144. Incrementalization: A general systematic approach for efficiency improvement. Computer Science Department, Indiana University, Bloomington, Indiana, March 18, 1996.
145. Incrementalization: A general systematic approach for efficiency improvement. Information Sciences Institute, University of Southern California, Los Angeles, CA, March 4, 1996.
146. Efficient computation via incremental computation. Ph.D. Super-Colloquium, Department of Computer Science, Cornell University, Ithaca, NY, February 1, 1996.
147. Systematic derivation of incremental programs. Kestrel Institute, Palo Alto, CA, July 1, 1994.
148. Automatic derivation of incremental programs. System Science Laboratory, Xerox Webster Research Center, Webster, NY, July 6, 1992.
149. Dynamic and static incremental attribute evaluation algorithms. System Science Laboratory, Xerox Webster Research Center, Webster, NY, June 10–11, 1992.

Other Presentations

150. What to do and who to ask? ACM SIGPLAN SPLASH 2017 Programming Languages Mentoring Workshop, Vancouver, British Columbia, Canada, October 24, 2017. (Invited Speaker)
151. Microlabs in computer science. Workshop for an NSF DUE Project, Suffolk County Community College, November 21, 2015.
152. Microlabs in computer science. Workshop for an NSF DUE Project, Pace University, November 15, 2014.
153. Starting your job and planning your career in academia. The CRA-W 2006 Grad Cohort Workshop, San Francisco, CA, April 1, 2006. (Invited Speaker)

PROFESSIONAL ACTIVITIES

Member

1. IFIP Working Group 2.1, Algorithmic Languages and Calculi, January 1998–present.

Editorial Board

2. ACM Books Editorial Board, Area Editor responsible for Programming Languages, October 2016–present.

Conference/Program Chair and Organization Roles

3. Co-Chair, ACM SIGPLAN Workshop on Partial Evaluation and Program Manipulation (PEPM), Denver, Colorado, January 2025.
4. Steering Committee Member, Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems (APPLIED), 2020–present.
5. General Co-Chair, with Elad Schiller, Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems (APPLIED), in conjunction with PODC at ACM FCRC, Orlando, Florida, USA, June 19, 2023.
6. Program Chair, and General Co-Chair, with David S. Warren, Workshop on Logic and Practice of Programming (LPOP): Programming with High-Level Abstractions, Online, December 13, 2022.
7. Co-Chair, with Laurent Gouzenes, Prolog Day Symposium Prolog-Powered Applications, Paris, France, November 11, 2022.
8. Program Co-Chair, with Andrea Formisano. The 37th International Conference on Logic Programming (ICLP), Online, September 20–27, 2021.
9. Co-Chair, with Chryssis Georgiou, Miguel Matos, Elad Schiller, Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems (APPLIED), in conjunction with PODC, Salerno, Italy, Virtual, July 30, 2021.
10. General Co-Chair, with David S. Warren, Workshop on Logic and Practice of Programming (LPOP), in conjunction with SPLASH, Chicago, Illinois, Virtual, November 15, 2020.
11. Program Co-Chair, with Ekaterina Komendantskaya, The 22nd International Symposium on Practical Aspects of Declarative Languages (PADL), New Orleans, Louisiana, USA, January 20–21, 2020.
12. Program Co-Chair, with Miguel Matos, Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems (APPLIED), in conjunction with DISC, Budapest, Hungary, October 14, 2019.
13. General Co-Chair, with David S. Warren, Workshop on Logic and Practice of Programming (LPOP), in conjunction with FLoC, Oxford, U.K., July 18, 2018.
14. Co-Chair, with David S. Warren, Workshop on Applications of Logic Programming (AppLP), in conjunction with ICLP, New York City, October 17, 2016.
15. Co-Organizer, with Michael Kifer, Symposium on Logic Programming: Systems and Applications, Stony Brook, NY, September 21–22, 2012.
16. Co-Chair, with Andrew Black, ACM SIGPLAN Workshop on Languages for Distributed Algorithms (LADA), in conjunction with POPL, Philadelphia, Pennsylvania, January 23–24, 2012.
17. Steering Committee Member, ACM SIGPLAN Workshop and Symposium on Partial Evaluation and Semantics-Based Program Manipulation (PEPM), 2005–2011.

18. Steering Committee Member at Large, ACM SIGPLAN/SIGBED Conference on Languages, Compilers, and Tools for Embedded Systems (LCTES), 2004–2009.
19. Finance Chair, ACM SIGPLAN Symposium on Languages, Compilers, and Tools for Embedded Systems (LCTES), San Diego, CA, June 11–13, 2003.
20. Co-Local Organizer, with Robert Dewar, The 57th Meeting of IFIP Working Group 2.1 on Algorithmic Languages and Calculi, New York City, March 30–April 3, 2003.
21. Steering Committee Member, ACM SIGPLAN Symposium on Languages, Compilers, and Tools for Embedded Systems (LCTES), 2001–2004.
22. Steering Committee Member, ACM SIGPLAN Workshop on Languages, Compilers, and Tools for Embedded Systems (LCTES), 1999–2001.
23. Co-Chair, with Reinhard Wilhelm, ACM SIGPLAN Workshop on Languages, Compilers, and Tools for Embedded Systems (LCTES), in conjunction with FCRC, Atlanta, Georgia, May 5, 1999.

Member of Prize Committee

24. Jury for the Alain Colmerauer Prize, 2023.
25. Jury for the inaugural edition of the Alain Colmerauer Prize, 2022.

Honorary Member of Scientific Committee

26. The Year of Prolog, Celebrating the 50th anniversary of Prolog, 2022-2023.

Member of Scientific Committee

27. Summer School on Generative and Transformational Techniques in Software Engineering, Braga, Portugal, July 4–8, 2005.

Member of External Program Committee

28. ACM SIGPLAN Conference on Object-Oriented Programming, Systems, Languages, and Applications, Vancouver, Canada, October 25–27, 2017.

Member of Program Committee

29. The 40th International Conference on Logic Programming, Dallas, Texas, October 11–17, 2024.
30. The 17th International Symposium on Functional and Logic Programming, Kumamoto, Japan, May 15–17, 2024.
31. The 11th Workshop on Horn Clauses for Verification and Synthesis, Luxembourg, April 7, 2024.
32. The 26th International Symposium on Practical Aspects of Declarative Languages, London, U.K., January 15–16, 2024.
33. The 39th International Conference on Logic Programming, London, U.K., July 9–15, 2023.
34. The 37th AAAI Conference on Artificial Intelligence, Washington DC, February 7–14, 2023.

35. The 24th International Conference on Distributed Computing and Networking, Kharagpur, India, January 4–7, 2023.
36. The 4th International Workshop on the Resurgence of Datalog in Academia and Industry, Datalog 2.0, Genova, Italy, September 5–8, 2022.
37. The 38th International Conference on Logic Programming, Haifa, Israel, July 31–August 8, 2022.
38. The 9th Workshop on Horn Clauses for Verification and Synthesis, Munich, Germany, April 2, 2022.
39. ACM SIGPLAN 2022 Workshop on Partial Evaluation and Program Manipulation, Philadelphia, Pennsylvania and Online, January 17–18, 2022.
40. The 23rd International Symposium on Principles and Practice of Declarative Programming, Tallinn, Estonia and Online, September 6–8, 2021.
41. The 36th International Conference on Logic Programming, Rende (CS), Italy, Virtual, September 18–24, 2020.
42. The 17th International Conference on Principles of Knowledge Representation and Reasoning, Rhodes, Greece, Virtual, September 12–18, 2020
43. The 35th International Conference on Logic Programming, Las Cruces, New Mexico, September 23–25, 2019.
44. The 3rd Workshop on the Resurgence of Datalog in Academia and Industry, Datalog 2.0, Philadelphia, Pennsylvania, June 4–6, 2019.
45. ACM SIGPLAN 2019 Workshop on Partial Evaluation and Program Manipulation, Lisbon, Portugal, January 14–15, 2019.
46. Workshop on Advanced Tools, Programming Languages, and Platforms for Implementing and Evaluating Algorithms for Distributed Systems, Egham, U.K., July 27, 2018.
47. The 19th International Symposium on Principles and Practice of Declarative Programming, Namur, Belgium, October 9–11, 2017.
48. The 8th International Conference on Computational Logics, Algebras, Programming, Tools, and Benchmarking, Athens, Greece, February 19–23, 2017.
49. ACM SIGPLAN 2017 Workshop on Partial Evaluation and Program Manipulation, Paris, France, January 16–17, 2017.
50. The 45th International Conference on Parallel Processing, Philadelphia, Pennsylvania, August 16–19, 2016.
51. The 13th Asian Symposium on Programming Languages and Systems, Pohang, Korea, November 30–December 2, 2015.
52. ACM SIGAda Annual International Conference on High Integrity Language Technology, Portland, Oregon, October 18–19, 2014.
53. The 24th International Symposium on Logic-Based Program Synthesis and Transformation, Canterbury, U.K., September 10–11, 2014.
54. The 30th International Conference on Logic Programming, Vienna, Austria, July 19–22, 2014.

55. ACM SIGAda Annual International Conference on High Integrity Language Technology, Pittsburgh, Pennsylvania, November 10–14, 2013.
56. The 15th International Symposium on Principles and Practice of Declarative Programming, Madrid, Spain, September 16–18, 2013.
57. The 23rd European Symposium on Programming, Rome, Italy, March 16–24, 2013.
58. ACM SIGPLAN 2013 Workshop on Partial Evaluation and Program Manipulation, Rome, Italy, January 20–21, 2013.
59. The 11th International Conference on Generative Programming and Component Engineering, Dresden, Germany, September 26–28, 2012.
60. The 2nd Workshop on the Resurgence of Datalog in Academia and Industry, Datalog 2.0, Vienna, Austria, September 11–13, 2012.
61. ACM SIGPLAN/SIGBED 2012 Conference on Languages, Compilers, Tools and Theory for Embedded Systems, Beijing, China, June 12–13, 2012.
62. The 10th International Conference on Generative Programming and Component Engineering, Portland, Oregon, October 23–24, 2011.
63. The 21st International Symposium on Logic-Based Program Synthesis and Transformation, Odense, Denmark, July 18–20, 2011.
64. The 14th International Workshop on Software and Compilers for Embedded Systems, Schloss Rheinfels, Germany, June 27–28, 2011.
65. ACM SIGPLAN/SIGBED 2011 Conference on Languages, Compilers, Tools and Theory for Embedded Systems, Chicago, Illinois, April 12–14, 2011.
66. The 20th International Conference on Compiler Construction, Saarbrücken, Germany, March 26–April 4, 2011.
67. The 20th International Symposium on Logic-Based Program Synthesis and Transformation, Hagenberg, Austria, July 23–25, 2010.
68. The 13th International Workshop on Software and Compilers for Embedded Systems, Rheinfels, Germany, June 29–30, 2010.
69. ACM SIGPLAN 2010 Workshop on Partial Evaluation and Program Manipulation, Madrid, Spain, January 18–19, 2010.
70. The 2nd International Workshop on Cyber-Physical Systems, Montreal, Canada, June 22, 2009.
71. The 12th International Workshop on Software and Compilers for Embedded Systems, Nice, France, April 23–24, 2009.
72. International Conference on Compiler Construction, York, U.K., March 22–29, 2009.
73. The 24th Annual ACM Symposium on Applied Computing, Programming Languages Track, Honolulu, Hawaii, March 8–12, 2009.
74. The 2008 IEEE/IFIP International Conference On Embedded and Ubiquitous Computing, Shanghai, China, December 17–20, 2008.
75. ACM SIGPLAN/SIGBED 2008 Conference on Languages, Compilers, and Tools for Embedded Systems, Tucson, Arizona, June 12–13, 2008.

76. The 11th International Workshop on Software and Compilers for Embedded Systems, Munich, Germany, March 13–14, 2008.
77. The 5th Asian Symposium on Programming Languages and Systems, Singapore, November 29–December 1, 2007.
78. ACM SIGPLAN/SIGBED 2007 Conference on Languages, Compilers, and Tools for Embedded Systems, San Diego, CA, June 13–15, 2007.
79. The 10th International Workshop on Software and Compilers for Embedded Systems, Nice, France, April 20, 2007.
80. ACM SIGPLAN 2007 Workshop on Partial Evaluation and Semantics-Based Program Manipulation, Nice, France, January 14–15, 2007.
81. ACM SIGPLAN/SIGBED 2006 Conference on Languages, Compilers, and Tools for Embedded Systems, Ottawa, Canada, June 14–16, 2006.
82. ACM SIGPLAN Workshop on Programming Languages and Analysis for Security, Ottawa, Canada, June 10, 2006.
83. The 9th International Workshop on Software and Compilers for Embedded Systems, Dallas, Texas, September 29–October 1, 2005.
84. ACM SIGPLAN/SIGBED 2005 Conference on Languages, Compilers, and Tools for Embedded Systems, Chicago, Illinois, June 15–17, 2005.
85. The 8th International Workshop on Software and Compilers for Embedded Systems, Amsterdam, The Netherlands, September 2–3, 2004.
86. ACM SIGPLAN 2004 Symposium on Partial Evaluation and Semantics-Based Program Manipulation, Verona, Italy, August 24–25, 2004.
87. The 7th International Workshop on Software and Compilers for Embedded Systems, Vienna, Austria, September 24–26, 2003.
88. The 8th ACM SIGPLAN International Conference on Functional Programming, Uppsala, Sweden, August 25–29 2003.
89. ACM SIGPLAN ASIAN Symposium on Partial Evaluation and Semantics-Based Program Manipulation, Aizu, Japan, September 12–14, 2002.
90. ACM SIGPLAN Joint Conference on Languages, Compilers, and Tools for Embedded Systems, and Software and Compilers for Embedded Systems, Berlin, Germany, June 19–21, 2002.
91. ACM SIGPLAN 2002 Conference on Programming Languages Design and Implementation, Berlin, Germany, June 17–19, 2002.
92. ACM SIGPLAN 2001 Workshop on Languages, Compilers, and Tools for Embedded Systems, Snowbird, Utah, June 22–23, 2001.
93. The 2nd International Symposium on Programs as Data Objects, Aarhus, Denmark, May 21–23, 2001.
94. ACM SIGPLAN-SIGSOFT 1999 Workshop on Program Analysis for Software Tools and Engineering, Toulouse, France, September 6, 1999.

95. The 5th International Conference for Young Computer Scientists, Nanjing, China, August 17–20, 1999.
96. ACM SIGPLAN 1999 Workshop on Languages, Compilers, and Tools for Embedded Systems, Atlanta, Georgia, May 5, 1999.
97. ACM SIGPLAN 1998 Workshop on Languages, Compilers, and Tools for Embedded Systems, Montréal, Canada, June 19–20 1998.
98. ACM SIGPLAN 1997 Symposium on Partial Evaluation and Semantics-Based Program Manipulation, Amsterdam, The Netherlands, June 12–13, 1997.

Conference Session Chair

99. The 39th International Conference on Logic Programming, London, U.K., July 11, 2023.
100. The 23rd International Symposium on Principles and Practice of Declarative Programming, Tallinn, Estonia and Online, September 6, 2021.
101. The 17th International Conference on Principles of Knowledge Representation and Reasoning, Rhodes, Greece, Virtual, Session Co-Chair, September 17, 2020.
102. The 22nd New Directions in Software Technology Workshop, Software Technology and Financial Markets, Oahu, Hawaii, December 12, 2019.
103. The 21st International Symposium on Principles and Practice of Declarative Programming and the 29th International Symposium on Logic-based Program Synthesis and Transformation, Porto, Portugal, October 8, 2019.
104. Workshop on Logic and Practice of Programming, Oxford, U.K., July 18, 2018.
105. The 23rd European Symposium on Programming, Rome, Italy, March 22, 2013.
106. ACM SIGPLAN Workshop on Partial Evaluation and Semantics-Based Program Manipulation, Charleston, South Carolina, January 9, 2006.
107. ACM SIGPLAN Symposium on Languages, Compilers, and Tools for Embedded Systems, San Diego, CA, June 12, 2003.
108. ACM SIGPLAN Joint Conference on Languages, Compilers, and Tools for Embedded Systems, and Software and Compilers for Embedded Systems, Berlin, Germany, June 20, 2002.
109. ACM SIGPLAN 2001 Workshop on Languages, Compilers, and Tools for Embedded Systems, Atlanta, Georgia, June 22, 2001.
110. The 5th International Conference for Young Computer Scientists, Nanjing, China, August 19, 1999.
111. ACM SIGPLAN 1999 Workshop on Languages, Compilers, and Tools for Embedded Systems, Atlanta, Georgia, May 5, 1999.
112. ACM SIGPLAN 1998 Workshop on Languages, Compilers, and Tools for Embedded Systems, Montreal, Canada, June 20, 1998.
113. IEEE 1998 International Conference on Computer Languages, Chicago, Illinois, May 15, 1998.

Invited Participant

114. The 2023 New Directions In Software Technology Workshop, Neuro-Symbolic Computation and Potential Important Applications, Online meetings September 26–27 2023, March 15, April 3, 2024.
115. The 2021 New Directions in Software Technology Workshop, Recent Progress and Next Steps in Software Research, Online, December 9–10, 2021.
116. The 22nd New Directions in Software Technology Workshop, Software Technology and Financial Markets, Oahu, Hawaii, December 9–12, 2019.
117. Quantum Immersion Workshop, Panel on Quantum Algorithms and Programming Environment, Stony Brook University, February 25, 2019.
118. New Directions in Software Technology Workshop, The Prospect of Artificial General Intelligence and Superintelligence, Oahu, Hawaii, December 11–14, 2018.
119. 2018 NSF Expeditions in Computing Principal Investigators’ Meeting, 10 Years of Transforming Science and Society, Washington, DC, December 10, 2018.
120. Workshop on Problems and Techniques for Incremental Re-computation: Provenance and Beyond, King’s College London, July 12–13, 2018.
121. New Directions in Software Technology Workshop, Security Components for the Industrial Internet of Things, Maui, Hawaii, December 4–7, 2017.
122. New Directions in Software Technology Workshop, Transformation-Based Generation of High-Assurance Software, St. John, U.S. Virgin Islands, December 5–8, 2016.
123. New Directions in Software Technology Workshop, Adversarial Computing: Active Engagement of Software in Adversarial Environments, St. John, U.S. Virgin Islands, December 7–10, 2015.
124. Microsoft Faculty Summit, Redmond, Washington, July 14–15, 2014.
125. Joint Mathematics Meetings AMS Special Session on Mathematical Underpinnings of Multivariate Complexity Theory and Algorithm Design, and Its Frontiers AND the Field of Incrementalization. San Diego, CA, January 11–12, 2013.
126. The 14th Annual Workshop on New Directions in Software Technology, Personal Digital Manufacturing, St. John, U.S. Virgin Islands, December 5–8, 2011.
127. The Inaugural Meeting of Working Group on Language Design, Mountain View, CA, June 1–3, 2011.
128. The 13th Annual Workshop on New Directions in Software Technology, Trustworthy Health Information Systems, St. John, U.S. Virgin Islands, December 6–9, 2010.
129. Dagstuhl Seminar on Software Synthesis, Leibniz Center for Informatics, Schloss Dagstuhl, Germany, December 7-11, 2009.
130. The CRA-W 2006 Grad Cohort Workshop, San Francisco, CA, March 31–April 1, 2006.
131. Dagstuhl Seminar on Program Analysis for Object-Oriented Evolution, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, February 24–28, 2003.
132. The 38th Meeting of IFIP Working Group 2.4 on Software Implementation Technology, San Miniato, Tuscany, Italy, May 27–June 1, 2001.

133. Dagstuhl Seminar on Code Optimisation: Trends, Challenges and Perspectives, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, September 17–22, 2000.
134. The 51st Meeting of IFIP Working Group 2.1 on Algorithmic Languages and Calculi, Magdalen College, Oxford, U.K., January 5–9, 1998.
135. NSF Infrastructure 97, University of Kentucky, Lexington, Kentucky, May 11–12, 1997.
136. The 50th Meeting of IFIP Working Group 2.1 on Algorithmic Languages and Calculi, Le Bischenberg, Alsace, France, February 20, 1997.
137. The 49th Meeting of IFIP Working Group 2.1 on Algorithmic Languages and Calculi, Rancho Santa Fe, CA, June 10–14, 1996.
138. Dagstuhl Seminar on Incremental Computation and Dynamic Algorithms, International Conference and Research Center for Computer Science, Schloss Dagstuhl, Germany, May 2–6, 1994.

Member of Review Panel

Search Committee

- ACM Books Editor-In-Chief Search Committee. October 2018–March 2019.

UNIVERSITY ACTIVITIES

- Search Committee for Dean of University Libraries, Stony Brook Univ., 2018–2019.
- Collaborative on Academic Careers in Higher Education (COACHE) Working Group on Promotion to Full Professor. Stony Brook Univ., May–December 2018.
- Computer Science Chair Search Committee. Stony Brook Univ., 2017–2018.
- Nomination Committee. Computer Science Dept., Stony Brook Univ., 2016–2017.
- Chair of SUNY Korea Computer Science Chair Search Committee. Computer Science Dept., Stony Brook Univ., 2015–2016.
- Search Committee for Dean of College of Engineering and Applied Sciences, Stony Brook Univ., 2015.
- Chair of SUNY Korea Faculty Search Committee. Computer Science Dept., Stony Brook Univ., 2011–2012.
- Excellence in Scholarship and Creative Activities Selection Committee. Stony Brook Univ., 2010–2013.
- Songdo Committee, the CS committee for the SBU campus at Songdo, S. Korea. Stony Brook Univ., 2009–2011.
- Discretionary Salary Increases Committee. Computer Science Dept, Stony Brook Univ., 2008, 2009, 2010, 2013, 2016.
- Graduate Information Director. Computer Science Dept., Stony Brook Univ., 2007–2008.

- Qualifying Exam Committee, Coordinator for Software Areas. Computer Science Dept., Stony Brook Univ., 2007.
- Student Careers Committee. Computer Science Dept., Stony Brook Univ., 2006–2008.
- Chair of Instructor Search Committee. Computer Science Dept., Stony Brook Univ., 2001–2019.
- Faculty Judge for Graduate Research Conference. Computer Science Dept., Stony Brook Univ., 2001, 2004.
- Graduate Admission Committee. Computer Science Dept., Stony Brook Univ., 2000–2011, 2013–2014.
- Chair of Research Environment Committee. Computer Science Dept., Indiana Univ., 1998–99.
- Faculty Affairs / Merit Review Committee. Computer Science Dept., Indiana Univ., 1997–98.
- Algorithms Qualifying Exam Committee. Computer Science Dept., Indiana Univ., 1996–2000.
- Admission and Awards Committee. Computer Science Dept., Indiana Univ., 1996–2000.
- Computer Science Department Picnic Czar. Cornell Univ., Fall 1994.
- Expanding Your Horizons Program. Cornell Univ., November 1991, 1992, 1993.
- Numerous leaderships and activities at Peking Univ. and Tsinghua Univ., 1983–89.

UNIVERSITY COURSES TAUGHT

1. CSE 505: Computing with Logic, Stony Brook U., Spring 2024.
2. CTI 102: What’s Logical, Stony Brook U., Spring 2023, 2024.
3. CSE 645: Seminar in Languages, Stony Brook U., co-taught first with Michael Kifer and now with also David S. Warren, C.R. Ramakrishnan, and Paul Fodor, Spring 2008–present.
4. CSE 307: Principles of Programming Languages, Stony Brook U., Spring 2007, 2009, 2011, 2012, 2014, 2023.
5. CSE 526: Principles of Programming Languages, Stony Brook U., Spring 2001, Spring 2005, Spring 2021, Spring 2022.
6. ITS 102: What’s Logical, Stony Brook U., Spring 2017, Spring 2021.
7. CSE 215: Foundations of Computer Science, Stony Brook U., Spring 2020.
8. CSE 535: Asynchronous Systems, Stony Brook U., Fall 2012, Fall 2013, Fall 2015, Fall 2018.
9. CSE 591: Programming Complex Algorithms, Stony Brook U., Fall 2016.
10. CSE 393: Concurrent and Distributed Algorithms, Stony Brook U., Spring 2012, Spring 2015.
11. CSE 690: Concurrent and Distributed Algorithms, Stony Brook U., Spring 2011, Spring 2012, Spring 2015.
12. CSE 392: Data Mining, Stony Brook U., Fall 2014.
13. CSE 614: Advanced Programming Languages, Stony Brook U., Spring 2008, Spring 2010, Fall 2013.

14. CSE 373: Analysis of Algorithms, Stony Brook U., Fall 2012.
15. CSE/ISE 308: Software Engineering, Stony Brook U., Fall 2001, Fall 2004, Spring 2010.
16. CSE 592: Protocol Design and Analysis, Stony Brook U., Spring 2009.
17. ITS 102: How to Solve Them, Stony Brook U., Spring 2007, Spring 2008, Spring 2009.
18. CSE/ISE 315: Database Transaction Processing Systems, Stony Brook U., Spring 2006.
19. CSE 690: Advanced Program Design and Optimization, Stony Brook U., Spring 2006.
20. CSE 591: Security Policy Frameworks, Stony Brook U., co-taught with Scott Stoller, Spring 2005.
21. CSE 391: Web Queries: Methods and Tools, Stony Brook U., Spring 2004.
22. CSE 626: Advanced Programming Languages, Stony Brook U., Spring 2003.
23. CSE 352: Artificial Intelligence, Stony Brook U., Spring 2003.
24. CSE 532: Advanced Database Systems, Stony Brook U., Fall 2002.
25. CSE/ISE 305: Principles of Database Systems, Stony Brook U., Spring 2002.
26. Organizer, CSE 667: Design and Analysis Research Seminar, Stony Brook U., Fall 2001.
27. CSE 675: Program Transformation and Program Analysis, Stony Brook U., Fall 2000.
28. CSCI B629: Language-Based Algorithm Design and Analysis, Indiana U., Fall 1999.
29. CSCI P523: Programming Language Implementation, Indiana U., Spring 1999.
30. CSCI B629: Program Analysis and Program Transformation, Indiana U., Spring 1999.
31. Organizer, Computer Science Department Colloquium, Indiana U., Fall 1998, Spring 1999.
32. CSCI C212/A592: Introduction to Software Systems (using Java), Indiana U., Fall 1997, Fall 1998.
33. CSCI B629: Language-Based Performance Analysis and Improvement, Indiana U., Spring 1998.
34. CSCI B403: Introduction to Algorithm Design and Analysis, Indiana U., Spring 1997.
35. CSCI B629: Program Transformation and Programming Environments, Indiana U., Spring 1997.
36. Organizer, Programming Languages Seminar, Indiana U., Fall 1996.

SUPERVISORY ACTIVITIES

Ph.D. Students Research Supervision

- John Idogun. Distributed systems. Stony Brook U., Fall 2023–present.
- Yi Tong. Rules and constraints: specifications and compiler implementation. Stony Brook U., Fall 2018–Fall 2020, Fall 2021–present.
- Matthew Castellana. High-level visual languages and implementation. Stony Brook U., Fall 2019–present. (Continued in the Ph.D. program under Prof. Ari Kaufman in Fall 2022)
- Kumar Shivam. Improving high-level executable specifications of replication and consensus algorithms. Stony Brook U., Summer 2022–June 2023. (Continued in the Ph.D. program under Prof. Shuai Mu in Summer 2023)

- Ashkan Banitalebi Dehkordi. Game specification and mechanism design: automated implementation and analysis. Stony Brook U., Fall 2016–Fall 2017.
- Saksham Chand (Ph.D., December 2019). *Safety and Liveness of Distributed Consensus Algorithms*. Stony Brook U., Spring 2016–Fall 2019. (Joined Apple in Spring 2020)
- Christopher Kane. High-level language abstractions for security. Stony Brook U., Summer 2015–present. (Became Research Assistant Professor at Stony Brook Univ. in Spring 2019)
- Xuetian (Kain) Weng. Model checking of distributed algorithms. Stony Brook U., Fall 2012–Summer 2019. (Joined Google Mountain View with M.S. in Summer 2019)
- Bo Lin (Ph.D., expected 2023). Compilation of a very high-level language for distributed algorithms. Stony Brook U., Fall 2009–present. (Joined Facebook NYC in Spring 2018. Joined SDF Labs in May 2023)
- Jonathan Brandvein (Ph.D., May 2016). *Demand-Driven Incremental Computation of Object Queries*. Stony Brook U., Summer 2009–Spring 2016. (Joined Google NYC in May 2016)
- Yury Puzis. Object-oriented modeling of a national electronic health records policy. Stony Brook U., Fall 2007–Fall 2008. (Continued in the Ph.D. program under Prof. I.V. Ramakrishnan in Spring 2009)
- K. Tuncay Tekle (Ph.D., December 2010). *Efficient Datalog Queries with Time and Space Complexity Guarantees*. Stony Brook U., Fall 2006–Fall 2010. (Joined LogicBlox in Fall 2010. Became Adjunct Assistant Professor at Stony Brook Univ. in 2014, and Visiting Assistant Professor in 2016. Joined Meta London in December 2023)
- Michael Gorbovitski (Ph.D., May 2011). *A System for Invariant-Driven Transformations*. Stony Brook U., Fall 2005–Spring 2010. (Joined Morgan Stanley in NYC in May 2010)
- Katia Hristova (Ph.D., December 2007). *From Rules to Efficient Algorithms for Cyber Trust Applications*. Stony Brook U., Summer 2003–Fall 2007. (Became Assistant Professor at New York City College of Technology in January 2008. Became Co-founder of ThraceCode in August 2014)
- Tom Rothamel (Ph.D., December 2008). *Automatic Incrementalization of Queries in Object-Oriented Programs*. Stony Brook U., Spring 2003–Fall 2008. (Started own software company in Summer 2007, developing Ren’Py game engine and SolarTech systems. Was a part-time Post-Doc at Stony Brook June 2009–September 2010; taught a course in Fall 2009)
- Fuxiang (Sean) Yu. Querying graphs via extended automata. Stony Brook U., Summer 2001–Spring 2004. (Continued in the Ph.D. program under Prof. Ker-I Ko in Summer 2004)
- Leena Unnikrishnan (Ph.D., December 2008). *Automatic Live Memory Bound Analysis for High-Level Languages*. Stony Brook U., Spring 2001–Fall 2008. Joint supervision with Prof. Scott Stoller. (Joined IBM Watson Research Center in Summer 2009)
- Ning Li. Implementation of loop optimization for aggregate array computations. Indiana U., Summer 1999–Summer 2000. (Became a Ph.D. student at Univ. of Wisconsin, Madison, in Fall 2000. Joined IBM Almaden Research Center with M.S. in August 2001. Joined Facebook in 2009)
- Gustavo Gómez (Ph.D., February 2007). *Automatic Time-Bound Analysis for High-Level Languages*. Indiana U., Summer 1997–Summer 2006. (Became a research staff at Univ. of

Colorado Boulder in January 2005. Joined Gambro BCT in May 2007. Joined Amazon in January 2008. Joined Rosetta Stone in March 2009. Joined Oracle in October 2013)

- Yuchen Zhang. Automating incrementalization. Indiana U., Summer 1997–Spring 2004. (Joined Motorola Software Technology Center with M.S. in Spring 2000)
- Byron Long. An algorithm for comparing deterministic regular tree grammars. Indiana U., Summer 1997. (Was a Ph.D. student of Prof. Daniel Leivant before and continued afterwards)

Post-Doctoral Associates Research Supervision

- Thang Bui. Stony Brook U., March–August 2021. Joint supervision with Prof. Scott Stoller. (Became Assistant Professor at West Virginia University, Inst of Technology, in August 2021; became Assistant Professor at California State U., Monterey Bay in 2023)
- Tom Rothamel. Stony Brook U., June 2009–September 2010. (Continued as lead developer of SolarTech’s Internet-connected embedded systems and the RenPy computer game engine)

External Dissertation Examination Committee Member

- Pierre Carbonnelle (Ph.D., 2024) *Standard, Interactive and Lifted Model Expansions using FO(.)*. KU Leuven, February 2024.
- Isabel Garcia (Ph.D., 2021) *A scalable static analysis framework for reliable program development exploiting incrementality and modularity*. IMDEA Software Institute and Technical University of Madrid, July 2021.
- Pritom Rajkhowa (Ph.D., 2019). *VIAP - An Automated System for Verifying Integer Assignment Programs with Loops*. Hong Kong University of Science and Technology, August 2019.
- Chin Soon Lee (Ph.D., 2001). *Program Termination Analysis and the Termination of Offline Partial Evaluation*. University of Western Australia, June 2001.
- Deepak Goyal (Ph.D., 2000). *A Language Theoretic Approach to Algorithms*. New York University, October 1999.

Dissertation Committee Chair or Member

- Mohammad Mahdi Javanmard (Ph.D., 2020). *Parametric Multi-way Recursive Divide-and-Conquer Algorithms for Dynamic Programs*. Stony Brook U.
- Eric Papenhausen (Ph.D., 2017). *Manual, Automatic, and Semi-Automatic Performance Optimization*. Stony Brook U.
- Pramod Ganapathi (Ph.D., 2016). *Automatic Discovery of Efficient Divide-and-Conquer Algorithms for Dynamic Programming Problems*. Stony Brook U.
- Reza Basseda (Ph.D., 2015). *Planning with Transaction Logic*. Stony Brook U.
- Spyros Hadjichristodoulou (Ph.D., 2014). *Mode-Sensitive Type Analysis for Prolog Programs*. Stony Brook U.
- Senlin Liang (Ph.D., 2013). *Non-Termination Analysis and Cost-Based Query Optimization of Logic Programs*. Stony Brook U.

- Paul Fodor (Ph.D., 2011). *Practical Reasoning with Transaction Logic Programming for Knowledge Base Dynamics*. Stony Brook U.
- Hui Wan (Ph.D., 2010). *Belief Logic Programs*. Stony Brook U.
- Leena Unnikrishnan (Ph.D., 2008). *Automatic Live Memory Bound Analysis for High-Level Languages*. Stony Brook U.
- Rahul Agarwal (Ph.D., 2006). *Combining Static Analysis and Run-Time Analysis for Verification and Testing of Multi-Threaded Programs*. Stony Brook U.
- Diptikalyan Saha (Ph.D., 2006). *Incremental Evaluation of Tabled Logic Programs*. Stony Brook U.
- V.N. Venkatakrishnan (Ph.D., 2004). *Enforcement Techniques for Expressive Security Policies*. Stony Brook U.
- Luis Castro (Ph.D., 2003). *Demand-Based Evaluation of Tabled Logic Programs*. Stony Brook U.
- Guizhen Yang (Ph.D., 2002). *Inheritance in Object-Oriented Knowledge Bases*. Stony Brook U.
- Andrew Kinley (Ph.D., 2001). *Learning to Improve Case Adaption*. Indiana U.

Ph.D. Students Research Proficiency Exam Committee Chair or Member

- Mohammad Mahdi Javanmard. Towards a general framework for cache-efficient demand-driven dynamic programming. Stony Brook U., August 2014.
- Alireza Saberi. Static binary analysis. Stony Brook U., September 2011.
- Zhiquan Gao. A survey on agent research. Stony Brook U., September 2006.
- Amit Sasturkar. A survey of trust management. Stony Brook U., June 2005.
- Shengying Li. A survey on tools for binary code analysis. Stony Brook U., August 2004.
- Diptikalyan Saha. Incremental maintenance of recursive views with applications to tabled logic programming. Stony Brook U., September 2003.
- Rahul Agarwal. Detecting race conditions in multithreaded programs. Stony Brook U., September 2003.
- Wei Xu. Making C programs memory safe. Stony Brook U., February 2003.
- Saikat Mukherjee. A survey of formal approach to workflow modeling. Stony Brook U., August 2002.
- Prem Uppuluri. Pattern-matching based intrusion detection systems. Stony Brook U., August 2001.
- Lap Chung Lam. A survey of data breakpoint and reverse execution. Stony Brook U., January 2001.
- Luis Castro. On the computational integration of well-founded and stable model semantics. Stony Brook U., November 2000.

Master's Thesis and Research Project Supervision

- Thejesh Arumalla, Understanding, optimizing, and checking distributed consensus algorithms. Spring 2023–Winter 2024. (Joined Goldman Sachs as VP in Spring 2024)
- Sai Bhavana Ambati. Translating DistAlgo to Harmony for model checking. Stony Brook U., Fall 2022.
- Kumar Shivam. *Specification and Runtime Checking of Algorithms for Replication and Consensus in Distributed Systems*. Master’s thesis, Stony Brook U., May 2022. (Joined the Ph.D. program at Stony Brook in Summer 2022)
- Akash Sateesh. Implementing Chandy-Lamport distributed snapshot and checking safety of leaderless consensus. Stony Brook U., Fall 2021.
- Faheem Ali. Implementing Chandy-Lamport distributed snapshot. Stony Brook U., Fall 2021.
- Kumar Shivam. Implementing leaderless consensus. Stony Brook U., Spring 2021.
- Ziang Wang. Configuration and evaluation of distributed algorithms in the cloud. Stony Brook U., Fall 2019–Spring 2020. (Joined Amazon in Seattle in Summer 2020)
- Akshay Aurora. Configurable visualization of distributed algorithms in DistAlgo, and deployment of DistAlgo programs in Jupyter. Stony Brook U., Fall 2019. (Joined Databricks in San Francisco in Spring 2020)
- Chetan Kasireddy. Improved specification, implementation, and analysis of Fast Byzantine Consensus (FaB), and improved specification and implementation of Practical Byzantine Fault Tolerance (PBFT). Stony Brook U., Spring–Fall 2019. (Joined Google in Sunnyvale in Spring 2020)
- Vishnu Dutt Paladugu. Implementation, testing, and debugging of Derecho for fast state machine replication with non-blocking data flows. Stony Brook U., Spring–Fall 2019. (Joined Snowflake in Spring 2020)
- Bansari Kalpeshbhai Patel. Configurable testing framework for distributed consensus. Stony Brook U., Spring–Fall 2019. (Joined Amazon Web Services in Seattle in Spring 2020)
- Nitin Kumar Mangalam. Configurable performance evaluation framework for distributed consensus. Stony Brook U., Spring–Fall 2019. (Joined Amazon Prime Now in Seattle in Spring 2020)
- Divyam Jaiswal. Optimization of distributed shared register under churn. Stony Brook U., Spring–Fall 2019. (Joined Amazon Web Services in Palo Alto in Spring 2020)
- Yueqi Hu. Implementation comparison and evaluation of Proof-of-Work consensus and more complete implementation of Congruity for replication. Stony Brook U., Spring 2019–Spring 2020. (Joined Cadence in Pittsburgh in Summer 2020)
- Lakshmi Narayanan Rajendran. Implementation and evaluation of Avalanche consensus. Stony Brook U., Spring 2019.
- Sai Miduthuri. Upgraded implementation of Fast Paxos. Stony Brook U., Spring 2019. (Joined Amazon Web Services in Summer 2019)
- Rahul Sihag. Implementation and evaluation of Paxos for System Builders (Paxos-SB) and Extended Virtual Synchrony (EVS) for replication services. Stony Brook U., Spring 2018–February 2019. (Joined Uber in Spring 2019)

- Nirvik Ghosh. Simulation of failures and experimental evaluation of Multi-Paxos for distributed consensus. Stony Brook U., Spring–Fall 2018. (Joined Apple in Spring 2019)
- Sai Srujan Eppalapally. Implementation of SimPy examples in DistAlgo for simulating complex interactions in concurrent and distributed environments. Stony Brook U., Spring–Fall 2018. (Joined VMware in Spring 2019)
- Selina Deep Kaur. Implementation of Viewstamped Replication (VR) and Practical Byzantine Fault Tolerance (PBFT). Stony Brook U., Spring–Fall 2018. (Joined Nutanix in Spring 2019)
- Dinesh Balani. Implementation and evaluation of Self-Stabilizing Paxos and Blockchain Backbone Protocol. Stony Brook U., Spring–Fall 2018. (Joined Microsoft in Spring 2019)
- Yi Tong. Constraint satisfaction problems: Comparing specifications and solutions. Stony Brook U., Spring 2018–Summer 2018. (Joined the Ph.D. program at Stony Brook in Fall 2018)
- Chintak Sheth. Multi-threaded implementation of processes and communication in C for Lamport’s distributed mutual exclusion. Fall 2017. (Joined Facebook in Spring 2018)
- Jieao Zhu. A repository of distributed algorithms and a repository of decision support queries. Stony Brook U., Fall 2015–Fall 2016. (Joined Snapchat in Spring 2017)
- Zhenjin Wang. Visualization and diversification for distributed algorithms. Stony Brook U., Fall 2015–Fall 2016. (Joined Amazon in December 2016)
- Saksham Chand. Formal verification of multi-Paxos using TLAPS. Stony Brook U., Summer 2015–Fall 2015. (Joined the Ph.D. program at Stony Brook in Spring 2016)
- Andre Hamilton. Supporting access control in programming languages. Stony Brook U., Spring 2011–Spring 2012. (Joined Microsoft in Spring 2012)
- Anu Kulkarni. Graph query and data query applications. Stony Brook U., Fall 2009–Fall 2010. (Joined Ariba in Spring 2011)
- Hiep Nguyen. *A Study on Access Control, Trust Management, Constraints and Types of a EHR System*. Master’s Thesis, Stony Brook U., December 2010.
- Yogesh Srihari. A survey of games for teaching. Stony Brook U., Spring 2009.
- Andrew Gaun. Analysis and modeling of a rule-based distributed access control policy. Stony Brook U., Fall 2008–Summer 2009.
- Jeongwon Seo. Optimization of game programs. Stony Brook U., Spring–Fall 2008.
- Vaishali Kshatriy. Data translation between relational and object-oriented databases. Stony Brook U., Spring 2007–Spring 2008.
- Krupa Jakkula. A study of security frameworks and access control policies. Stony Brook U., Fall 2006–Spring 2007.
- Krupa Jakkula. Enhancements of an interactive Web query tool. Stony Brook U., Spring 2006.
- Fatima Zarinni. A system for planning clinical trials in drug development programs. Stony Brook U., Spring 2006–Spring 2007.

- Sen (Boris) Wu. Overview for modeling a nuclear power plant digital feedwater control system. Stony Brook U., Spring 2006.
- Brian Black. Methods for generating user interfaces. Stony Brook U., Fall 2005–Spring 2006.
- Chenghua Yan. Security issues in an interactive Web query tool. Stony Brook U., Spring 2005.
- Yevgen Borodin. Generating Web-based data acquisition tools from RelaxNG XML schemas. Stony Brook U., Fall 2004–Spring 2005. (Joined the Ph.D. program at Stony Brook in Fall 2006)
- Yevgen Borodin. A constraint-based random relation generator. Stony Brook U., Summer 2004.
- Michael Gorbovitski. Very high-level languages and security applications. Stony Brook U., Spring 2004–Summer 2005. (Joined the Ph.D. program at Stony Brook in Fall 2005)
- Byungchan Yim. Enhanced interface and implementation of a Web link traverser. Spring–Fall 2004.
- Gayathri Priyalakshmi. *Generating Efficient Programs for Solving Relational Database Queries*. Master’s Thesis, Stony Brook U., August 2004. (Joined Bloomberg in Manhattan in August 2004. Joined Netezza in Boston in September 2006. Joined Oracle in April 2013)
- Mariya Fazylova. Enhanced methods and techniques for interactive Web queries. Stony Brook U., Summer 2003–Spring 2004.
- Siddhartha Singh. Debugging performance and transforming XML documents for a molecular viewer. Stony Brook U., Spring–Fall 2003. (Was a developer at Lucent and continued afterwards)
- Tom Rothamel. Analysis and optimization of object-oriented programs. Stony Brook U., Summer–Fall 2002. (Joined the Ph.D. program at Stony Brook in Fall 2002)
- Tom Rothamel. Motion controller scripting language. Stony Brook U., Spring–Summer 2002.
- Zongming Pan. Performance of a molecular viewer parsing XML documents. Stony Brook U., Fall 2001–Fall 2002. (Was a Post-Doc in Molecular Biology at Stony Brook and became a Post-Doc at U Penn afterwards)
- Jingyu Yan. Visual class machine language and code generation. Stony Brook U., Summer–Fall 2001. (Joined the Ph.D. program at UNC in Fall 2002)

Master’s Thesis Committee Chair or Member

- Daniel Dean. *The Visual Development of GCC Plug-ins with GDE*. Stony Brook U., May 2009.
- Aditi Pandit. *Design and Applications of a High-Level Transparent Java Interface for Flora-2*. Stony Brook U., May 2005.
- Vishal C. Chowdhary. *Encapsulation and Persistent Storage Mechanisms for Flora-2 Modules*. Stony Brook U., August 2004.

Graduate Students Practical Training Supervision

Many, 2018–present.

- Xuetian (Kain) Weng. Program analysis for enforcing privacy and security constraints. Google, Mountain View, CA, May–August 2017.
- Xuetian (Kain) Weng. Verification of distributed systems. Google, Mountain View, CA, May–August 2016.
- Xuetian (Kain) Weng. Program optimization and verification. Google, Mountain View, CA, May–August 2015.
- Yuchen Zhang. Program transformation. Motorola Labs, Illinois, Feb. 2000–Jan. 2001.
- Yuchen Zhang. An investigation of compiler optimizations and compiler development tools for transport-triggered architectures. NEC Research, New Jersey, Jan. 2000–Feb. 2000.
- Chandrashekhhar Shetty. LAURE system development. Bellcore, New Jersey, Summer 1997.

Bachelor’s Honors Thesis and Honors Project Supervision

- Wilson Wu. Automating course prerequisite information queries and visualization. Spring 2023–present.
- Eric Keough. Improving an invariant-driven transformation system and building a library of optimization rules. Fall 2020–July 2021. (Joined Amazon in Seattle in July 2021)
- Edgar Sit. Checking safety and liveness of distributed consensus algorithm Raft. Fall 2020. (Became an MS student at Stony Brook in 2021)
- Yuege Chen. Programming security protocols in DistAlgo and C#. Stony Brook U., May 2018. (Joined the Ph.D. program at Duke U in Fall 2018)
- Zhenjin Wang. Modeling, analysis, and visualization of privacy policies. Stony Brook U., May 2015. (Became an MS student at Stony Brook in Fall 2015)
- Youngseo Son. Privacy policy specification with programming languages. Stony Brook U., May 2015. (Joined the Ph.D. program at Stony Brook in Fall 2015)
- Matthew Gruen. Automating performance evaluation of logical queries. Stony Brook U., May 2012. (Became an MS students at Stony Brook in Fall 2012)
- David Mazza. *Leveraging Dynamic Indexing for Static Rules via Program Rewriting*. Stony Brook U., May 2012. Joint supervision with Profs. Michael Kifer and David S. Warren.
- Jintae Jang. *Minesweeper Solver*. Stony Brook U., May 2004.
- Hong (Christine) Yu. *MultiQuery: An Assistant for Interactive Web Queries*. Stony Brook U., May 2003. (Joined the MS program at NYU in Fall 2003)
- Rishi R. Sinha and Steven Sehgal. *Soft Real-Time Concurrent Class Machines*. Stony Brook U., May 2002. (Joined the Ph.D. program at UIUC in Fall 2012. Sehgal joined Microsoft)
- Jia (Jay) Liu. *MultiRunner: An Intelligent Link Traversing Agent*. Stony Brook U., May 2002. (Became a medical school student later)

Undergraduate Research Project Supervision

- Nicholas Guzzardo. Implementing failure detector and leader election services for dynamic distributed systems. Summer–Fall 2022. (Joined IBM in Fall 2022)

- Regina Wong. Running Python program analysis expressed using DistAlgo extended with Datalog rules. Spring–Fall 2021. (Joined Capital One in Spring 2022)
- Joseph Nestor Tan. Improved programming of board game logic and graphics. Spring–Summer 2021.
- Eric Keough. Improving distributed matrix multiplication and a scientific computation program. Spring 2020. (Went on to do Computer Science Honors project)
- Wenjun Qu. Programming security protocols in DistAlgo and Java. Summer 2017.
- Jackie Wang. Programming security protocols in DistAlgo. Summer 2017.
- Allen Wang. Logical puzzles, solutions, and programs. Summer 2017.
- Anthony Ripa. Exploring programming of high-level queries. Stony Brook U., Summer 2016. Joint supervision with Profs. Michael Kifer and David Warren.
- Youngseo Son. Data analysis and visualization for social networks. Stony Brook U., Summer 2014–Spring 2015. (Went on to do Computer Science Honors project.)
- Arjun Menon. Automatic object-oriented modeling of a national electronic health records policy. Stony Brook U., Spring 2011–Spring 2012.
- Andre Hamilton. Exploring distributed programming models. Stony Brook U., Fall 2009. (Joined MS program at Stony Brook)
- James Taliento. Software vulnerability analysis. Stony Brook U., Summer 2009.
- Dennis Mok. Building and navigating Web graphs. Stony Brook U., 2003–2004.
- Sijia (Amanda) Chen. Portable collaborative bibliography repository. CRA Distributed Mentoring Affiliates Program, Stony Brook U., Summer 2002. (Joined MS program at Stanford U in Fall 2002)

Intern Supervision

- Victor Prchlik. Implementing DBFT leaderless Byzantine consensus in DistAlgo. UC Santa Barbara. Summer 2023–present.
- Victor Prchlik. Data Analysis for Internet Addiction. Ward Melville High School InSTAR Science Research Program, Spring–Fall 2021.
- Derrick Kempster. Development of a DistAlgo to Scyther translator for security protocol verification. Kings Park High School Independent Science Research Program, Summer 2017–Summer 2018. (Semifinalist of Junior Science and Humanities Symposia (JSHS) Program. Admitted to dream school Rochester Institute of Technology)
- Ling-Ling Zhang. Security policy analysis for a national electronic health record service. Ward Melville High School InSTAR Science Research Program, Summer 2009–Spring 2010. (Early action admission into dream school Stanford University)
- Kenny Wang. Creating a heart simulation program from a CellML model. College of Engineering and Applied Sciences Summer Research Institute, Stony Brook U., Summer 2006.
- Sandra Tinta. Schema-based data acquisition for Web applications. Alliance for Graduate Education and the Professoriate, Stony Brook U., Summer 2004.

UNIVERSITY LECTURES

- Recursive rules with aggregation: A simple unified semantics. Computer Science Dept., Stony Brook U., September 7, 2023.
- From meta frameworks and transformations to distributed computing and more. Computer Science Dept., Stony Brook U., February 2, 2023.
- Programming with logic rules and everything else, seamlessly. Computer Science Dept., Stony Brook U., September 29, 2022.
- From meta frameworks and transformations to distributed computing and more. Computer Science Dept., Stony Brook U., February 11, 2022.
- Recursive rules with aggregation: A simple unified semantics. Computer Science Dept., Stony Brook U., October 28, 2021.
- Languages and methods for programming concurrent and distributed algorithms. Two guest lectures for CSE 535, Stony Brook U., Fall 2014, 2016, 2017, 2021.
- Discrete Math with programming: A principled approach. Computer Science Dept., Stony Brook U., April 8, 2021.
- Distributed computing: Logic, algorithms, and programming. Computer Science Dept., Stony Brook U., December 4, 2020.
- Assurance of distributed algorithms and systems: Runtime checking of safety and liveness. Computer Science Dept., Stony Brook U., November 12, 2020.
- Recursive rules with aggregation: A simple unified semantics. Computer Science Dept., Stony Brook U., September 10, 2020.
- Moderately complex Paxos made simple: High-level executable specification of distributed algorithm. Computer Science Dept., Stony Brook U., October 31, 2019.
- Knowledge of uncertain worlds: Programming with logical constraints. Computer Science Dept., Stony Brook U., October 24, 2019.
- Knowledge representation and reasoning: What about the paradoxes? Computer Science Dept., Stony Brook U., September 27, 2018.
- From clarity to efficiency for distributed algorithms. Computer Science Dept., Stony Brook U., March 23, 2018.
- Founded semantics and constraint semantics of logic rules. Computer Science Dept., Stony Brook U., February 8, 2018.
- Differentiation, finite differencing, incrementalization: From clarity to efficiency. Faculty Seminar, Computer Science Dept., Stony Brook U., May 24, 2017.
- The founded semantics of logic rules and its efficient computation. Computer Science Dept., Stony Brook U., February 11, 2016.
- High-level executable specifications of distributed algorithms. Computer Science Dept., Stony Brook U., September 12, 2013.
- Incrementalization: From clarity to efficiency. Computer Science Dept., Stony Brook U., August 30, 2013.

- Programming and optimizing distributed algorithms. Computer Science Dept., Stony Brook U., July 28, 2011.
- From clear specifications to efficient implementations. Computer Science Dept., Stony Brook U., December 8, 2006.
- Design by building up and breaking through abstractions. Computer Science Dept., Stony Brook U., January 28, 2005.
- Iterate, incrementalize, and implement: A systematic approach to efficiency improvement and guarantees. Computer Science Dept., Stony Brook U., November 7, 2003.
- From rules to analysis programs with time and space guarantees. Computer Science Dept., Stony Brook U., April 23, 2003.
- Methods and techniques for incremental computation. Computer Science Dept., Stony Brook U., October 17, 2002.
- Program optimization using indexed and recursive data structures. Computer Science Dept., Stony Brook U., January 30, 2002.
- Systematic and powerful program optimization by incrementalization. Computer Science Dept., Stony Brook U., October 5, 2001.
- From recursion to iteration: What are the optimizations? Computer Science Dept., Stony Brook U., September 29, 2000.
- Loop optimization for aggregate array computations. Computer Science Dept., Indiana U., March 3, 1998.
- Dependence analysis for recursive data. Computer Science Dept., Indiana U., February 27, 1998.
- Principled strength reduction. Computer Science Dept., Indiana U., November 21, 1997.
- Incremental computation: methods, techniques, and applications. Computer Science Dept., Indiana U., January 24, 1997.
- Incrementalization for efficiency improvement: some logical accounts. IU Logic Group, Indiana U., January 22, 1997.
- Cache as cache can. Computer Science Dept., Indiana U., October 4, 1996.
- Efficient computation via incremental computation. Integration Program, Computer Science Dept., Indiana U., September 13, 1996.
